

FIRST EGG BANK COURIER SERVICE –
SAFE AND PROFESSIONAL TRANSPORTATION
OF CRYOD DONOR MATERIALS FROM DOOR
TO DOOR BY OUR COURIER!

ORDER CHECKLIST

To order First Egg Bank Courier Service, we need to have the list of documents, provided by the client

- Confirmation from the releasing/receiving clinics via e-mail that any import/export permit is in place if required by the local regulatory body by which they are governed and/or local border control/customs - we'll need a copy as well. Please Note: the onus is on the releasing/receiving clinics to ensure they are compliant with any local regulations.
- Confirmation that a consent/authorisation to release form is signed and in place with the releasing clinic. If the samples are leaving a US clinic they will need the consent/authorisation form notarised and the original back with them - not scanned/e-mailed.
- Clinical paperwork (probably will be provided by the releasing clinic when we collect the samples) - freeze dates/codes, thaw protocol, blood tests.
- Full address, contact telephone and e-mails of the releasing and receiving clinics.
- Client's full name - if the releasing clinic knows you by another name we'll need that as well. Client's contact details - full address, contact numbers and e-mails.
- Settle all outstanding fees with the releasing clinic. They will not release your samples otherwise.
- Settle all outstanding fees of courier delivery of cryo material.
- Cover letter from the releasing clinic on firm blank on biological cryo material transported in special cryo container, stating that oocytes/embryos/sperm samples are delivered to another IVF clinic for continuation of treatment and x-raying through airport or train station security screening is not allowed.
